

Filtration

Filtertanks rubberlined – ebonite

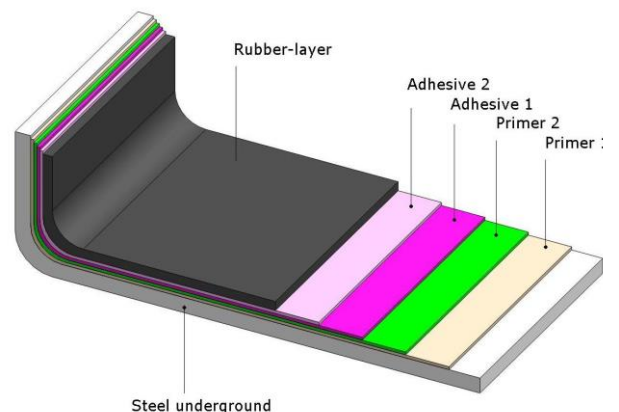

RUBBER-LINED steel pressure filters with filterstar or nozzle-plates

Our hardrubber-qualities are high-quality universal linings ebonite with excellent chemical resistance.

This liningqualities have been applied in process- and filtertanks where chemical attack of steelwork occurs by aggressive acids and alkalis under pressure.

Practice has been proven very long life-times under moderate severe conditions, for example 30% Hydrochloric acid.

Food grade quality up to 80°C
Depending on medium max.100°C
Potable water applications max.80°C.

Filtration

RUBBER-LINED steel tanks

Filternozzles:

- Slotsize from 0.2 to 2.0 mm
- With safety-nut and safety-gasket
- Mat. PP – max. 60°C (standard)

Other options:

- Mat. PPGV30S - max 110°C
- Mat. PVDF – max.135°C
- Mat. Stainless steel

Type K1

Type D

Type C2
